

C-Fresh™ Films

for VFFS Packaging of Lettuce & Salad Mixes

The first film to maximize heat sealing properties without compromising shelf-life!

C-Fresh™ Advantages:

- ✓ Wide sealing temperature range with high burn through resistance
- ✓ 25% greater seal strength than competitive films
- ✓ Superior sealing performance through contamination and wrinkles
- ✓ Co-extruded formulation designed to perform on a wide range of VFFS machinery
- ✓ Optimized O.T.R. for enhanced quality and extended shelf life

C-Fresh™ films are produced with proprietary resin technology that permits sealing through wrinkles and contamination by allowing additional seal heat and pressure to be applied without melting through the film. The film has exceptional clarity and is highly resistant to abrasions and pinholes. The end result is greater packaging line efficiency with fewer re-bags and fewer quality complaints due to leakers.

Typical C-Fresh™ Film Specifications

Film	O.T.R. (cc/100 s.i./24 hrs.)	Typical Applications	Mil Thickness
C-150	150	Romaine Lettuce	2.75
C-220	220	Salad Mixes, Cole Slaw	2.25
C-250	250	Iceberg Lettuce, Salad Mixes	2.00
C-280	280	Iceberg Lettuce	1.80
C-400	400	Carrots, Kale	2.00

*Custom O.T.R. and gauges available, laser micro perforating available for special applications
